House of Industry (Federation of Austrian Industries), Vienna*

**Mag. Stefan SZYSZKOWITZ**

Spokesman of the Executive Board, EVN AG

Member of the Board of  
Vienna Economic Forum

# Energy Transition into a reliable renewable system

---

**The successful transformation of our energy system into a reliable renewable system is one of the greatest challenges of our time and consequently for our industry.**

**EVN** is committed to contribute to such transition as an **“enabler”**. There are two main reasons for taking such a responsible role in this process.

**EVN** Firstly, as an operator of distribution network infrastructure we are in charge of integrating growing volumes of decentralised produced renewable energy, thereby constantly ensuring security of supply.

**EVN** Secondly, EVN – according to its Strategy 2030 – will invest strongly into new renewable generation facilities, especially wind and photovoltaics.

**Our aim is to realise new renewable projects in all our core markets, namely Lower Austria, Bulgaria and North Macedonia.**

As a strong and reliable partner, we are thus contributing to a carbon neutral energy future in the entire region.
